

SWATI CHAUHAN

Software Developer (Laravel)

Modinagar, Ghaziabad, India | 8755235463 | mrtswatichauhan@gmail.com

PROFILE SUMMARY

I am a backend-focused Laravel Developer with around 2 years of experience in building and maintaining web applications. I excel in developing RESTful APIs, handling CRUD operations, and working with structured data for frontend integration. My background includes expertise in authentication, debugging, and optimizing backend workflows using Laravel tools. I am eager to contribute to scalable and efficient backend systems

SOFT SKILLS

Languages: PHP, JavaScript, HTML, CSS

Framework: Laravel, Vue.js(Familiar)

Database: MySQL

Tools & Technologies: Git, GitHub, Postman, Laravel Passport, Laravel Telescope

PROFESSIONAL EXPERIENCE

Laravel Developer

Epic Web Techno | Feb 2024 – Present

A technology company specializing in web application development

- Developed backend APIs for a B2B & B2C application, managing users, products, and categories
- Implemented CRUD operations for core modules (users, products, categories)
- Built APIs for adding, updating, and soft deleting records
- Developed search and sorting functionalities for efficient data handling
- Structured API responses in JSON format based on frontend requirements
- Worked on PDF import/export functionality for data processing
- Implemented logic to identify duplicate records and maintain data consistency
- Created APIs for data redirection and module integration
- Used Laravel Passport for authentication and secure API access
- Utilised Laravel Telescope for debugging and performance monitoring

Laravel Trainee

TPM Guru Pvt. Ltd. | Feb 2023 – Jan 2024

- Assisted in backend development using the Laravel framework
- Worked on CRUD operations and basic API development
- Supported in building user and product-related functionalities
- Gained hands-on experience with MySQL database operations
- Contributed to an internal CRM-based system for office operations
- Developed and maintained APIs for employee and data management modules
- Learned debugging techniques and backend workflow structure

PROJECTS

B2B & B2C Management System

- Developed APIs for user management, product handling, and category modules
- Implemented search, sorting, and duplicate data handling logic
- Designed structured JSON responses and soft delete functionality
- Built PDF import/export features for data operations

CRM (Customer Relationship Management) System

- Contributed to backend development of an internal CRM system for office operations
- Developed APIs for employee and data management modules
- Implemented CRUD operations and structured data handling
- Assisted in improving backend workflows and debugging issues

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering

Shanti Institute of Technology, Meerut

2018 – 2022 | 80%

SOFT SKILLS

- Problem Solving
- Debugging Mindset
- Team Collaboration
- Quick Learner
